CAREER SUMMARY

Software Developer with a strong foundation in Python, Java (OOP), and C programming, specializing in building and optimizing machine learning models using TensorFlow and PyTorch. Strong foundation in data manipulation and analysis with Pandas, as well as database management with MySQL and MongoDB for efficient data handling. Adept at problem-solving, decision-making, and developing scalable applications. Passionate about leveraging technical expertise to drive innovation in software development and AI-driven solutions.

EDUCATION

Computer Science Engineering - Data Science, (2025), K.G. Reddy College of Engineering And Technology 81.6%
MPC | 2021 Sri Vivekananda Junior College 89.8%
SSC | Year 2019 Telangana Model School 95%

TECHNICAL SKILLS

Tools: MS Office, Tableau, Power BI and WEKA
Database Management: MongoDB and AWS, Intermediate in MySQL
Programming Languages: Intermediate in Python, and Java
AI/ML Frameworks: PyTorch, and scikit-learn, Matplotlib, and Seaborn
Natural Language Processing (NLP): Intermediate in handling API, LLM and RAG

PROJECTS

Virtual Interactive Builder of Experiences [A Storytelling Chatbot] (December – January 2025)

- Successfully engineered a dynamic narrative generation system by integrating RAG technologies, enabling personalized storytelling experiences.
- Achieved seamless interaction between MongoDB, Pinecone, and advanced NLP models, demonstrating expertise in scalable data storage, vector search, and generative AI.
- Delivered high-quality, contextually accurate stories by leveraging the Llama 3.3 70B model for narrative generation, enhancing user engagement and satisfaction.
- MongoDB, Pinecone, Colbert-XM, Llama 3.3 70B, Prompt Engineering

BCG GenAI Job Simulation on Forage - July 2024

- Completed a job simulation involving designing AI-powered financial chatbot for BCG's GenAI Consulting team.
- Integrated and interpreted complex financial data from 10-K and 10-Q reports, employing rule-based logic to create a chatbot that provides user-friendly financial insights and analysis.

Cognizant Artificial Intelligence Job Simulation on Forage - September 2024

- Completed a job simulation focused on AI for Cognizant's Data Science team.
- Conducted exploratory data analysis using Python and Google Colab for one of Cognizant's technology-led clients, Gala Groceries.
- Prepare a Python module that contains code to train a model and output the performance metrics for the Machine Learning engineering team.
- Communicated findings and analysis in the form of a PowerPoint slide to present the results back to the business.

CERTIFICATIONS

Data Science – Internship Studio (Oct–Nov 2024)
Artificial Intelligence Job Simulation – Cognizant, Forage (Aug–Sept 2024)
Data Visualization: Empowering Business with Effective Insights Job Simulation - TATA, Forage (June-July 2024)
GenAI Job Simulation – BCG, Forage (July 2024)
Power BI Job Simulation – PwC Switzerland, Forage (July 2024)
Data Science and Machine Learning – Ybi Foundation (June 2023)
Python For Data Science and Hackathon – EducateNXT, (Nov 2023)
